*Election/Restrictions*

1. Applicant's election without traverse of Species I shown in Figs. 1, 5 & 6 in the reply filed on June 9, 2005 is acknowledged.

2. Claim 3 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 9, 2005.

Claim 3 is particular to the unelected species. See page 10, last paragraph.

*Information Disclosure Statement*

3. The information disclosure statement filed June 23, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

*Drawings*

4. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted

Art Unit: 3679

by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The replacement drawings received on June 9, 2005 are approved.

*Specification*

6. The disclosure is objected to because page 3, line 15 includes the term "the applicant". The term is inappropriate in a document intended for publication as a U. S. patent. A patent has an inventor(s) and can have an assignee, but it does not have an applicant.

*Claim Objections*

7. The claims are objected to as failing to comply with 37 CFR 1.75(i) because elements of the claims are not separated by line indentation.

*Claim Rejections - 35 USC § 102*

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sone et al, US 6,120,383. Fig. 1 shows a fixed type constant velocity joint characterized by comprising an

outer joint part 1 having eight axially extending guide grooves 1b formed in the spherical inner peripheral surface 1a thereof, an inner joint member 2 having eight axially extending guide grooves 2b formed in the spherical outer peripheral surface 2a thereof, eight torque transmitting balls 3 disposed one by one in ball tracks defined by cooperation between the guide grooves of the outer and inner joint members, and a cage 4 holding the torque transmitting balls. Fig. 1A (see the annotated copy of Fig. 1A attached to this Office action) shows the angle defined by the straight line b-b connecting a contact point A between the cage 4 and the outer joint member 1 and a contact point B between the cage 4 and the inner joint member 2, and the cage center line 0-0 is zero degrees (i.e. not more than 10 degrees).
